## II. RATES & CHARGES

### C. TAP-ON FEES

1. 5/8 X 3/4 inch meter . . . . . \$ 450.00

If a road crossing is required for the Water System's service line to reach a proposed meter location and the distance from main to meter is 60 feet or less, the cost of the road crossing is included in the above price. If the total service line length is greater than 60 feet, the customer shall pay the cost of installing the additional footage. (T)

2. Larger Meters. The contribution for all water service installations larger than 5/8 x 3/4 inch shall be the actual cost of the complete water service installation including the cost of crossing the road and any equipment required to meet the customer's water supply needs. An estimate of the cost shall be made by the Water System and paid in advance by the customer prior to the installation. Any over-payment shall be refunded by the Water System and any under-payment shall be paid by the customer to the Water System. (I)

## II. RULES & REGULATIONS

---

The following Rules and Regulations are prescribed for the customers in the area served by Butler County Water System, Inc., (System). All other policies not specifically mentioned herein shall be as delineated in regulations administered by the Public Service Commission.

### A. SERVICE INFORMATION

1. Application for Service. Each prospective customer desiring water service may be required to sign the System's standard Application for Water Service before service is supplied by the System. No service will be installed unless there is a main distribution line existing along the road from which service is requested.

If service is desired on the same side of the road as the water main, the meter shall be installed within 5 feet of the water main. If service is desired on the opposite side of the road from the water main, the service line will be run under the road and the meter installed on private property adjacent to the highway right of way. For 5/8 x 3/4" meters the cost of the road crossing is included in the standard tap-on fee, provided that the distance from the main line to the meter point is not more than 60 feet. If the distance is greater than 60 feet, the customer will be required to pay the cost of installing the pipe for the additional footage. For larger meters the actual cost of the entire road crossing is paid by the customer.

(T)

A tap-on fee based on the meter size as provided in the Schedule of Rates and Charges must be paid on all new connections to the existing water line.

## II. RULES & REGULATIONS

### 2. Standard Service (Standard Water Tap)

- a. Based on information provided by the customer, the standard service size for a water tap shall be established by the Water System. Each customer's meter shall be properly sized to measure all water usage of the customer as determined by the Water System. The meter installation cost to meet the standard service size for each customer shall be paid for by each customer at the Water System's established tap-on fee for the meter size required. (D)
- b. Should a customer's rate of water flow and usage change such that the water meter will not accurately measure the water used, the customer shall be responsible for paying the Water System's established tap-on fee based on the meter size required to accurately measure the water used. The Water System will refund to the customer the salvage value of the original metering equipment that can be recovered and reused.
- c. Any existing or proposed service connection which has minimum and/or maximum flow rates that do not fall within the range defined below for a Standard Service shall be considered a Non-Standard Service. The range of flow rates for a Standard Service with a particular meter size shall be as follows:
1. The customer's low flow rate shall be greater than the 95 percent accuracy point for low flow registration of the meter.
  2. The customer's sustained high flow rate shall be less than the maximum continuous rate specified for the meter and the customer's

## II. RULES & REGULATIONS

### **BILLINGS, METER READINGS AND RELATED INFORMATION**

1. **Billing.** Bills will be rendered monthly and shall be paid within 16 days from date of bill (the "due date") at the office of the System. Should bills not be paid as above, the System may at any time thereafter, upon five days written notice to customer ("Past Due Notice"), discontinue service. (N)

Bills paid on or before the due date shall be payable at the net amount, but thereafter the gross amount shall apply. The gross amount includes the late payment charge as described in the Schedule of Rates and Charges. Should the final due date for payment of the bill at the net amount fall on a Saturday, Sunday, or holiday, the business day next following the due date will be held as a day of grace for delivery of payment.

A customer shall not be excused from timely payment of any bill or performance required by any notice because of a failure to receive the bill or notice.

In lieu of receiving a paper bill delivered via the U.S. Postal Service, a customer may request an electronic bill (E-bill) as the preferred method of delivery. The E-bill will be delivered to the email address shown on a customer's Application for Service or E-bill Enrollment Form. A customer may enroll for E-billing, change his/her email address, or cancel a previous request for E-billing by submitting a request to the System. If it becomes necessary to send a Past Due Notice to an E-bill customer, that notice will be delivered by the U.S. Postal Service.

## II. RULES & REGULATIONS

2. Prorating First and Final Bills. When a customer begins or terminates water service on a date that results in the customer receiving less than one month of service and the usage during this period is less than the gallons included in the minimum bill for the meter size at that location, the minimum bill will be prorated based on the number of days the customer received service during that billing period.
3. Metering for Billing. Billing for each installed meter shall be based on the volume of water used through the meter.
4. Dual Metering. When two meters are required by the System to measure the high and low flows for one connection, the bill shall be based on the combined volume of water used through both meters with the minimum bill and bill computation based on the largest meter.

## II. RULES & REGULATIONS

### 8. Adjustments for Customer Service Line Leaks

(N)

Customers with a leak in their outside, underground service line who report the leak to the Water System within 30 days after being billed may have the bill adjusted subject to the following rules and conditions:

- a. The leak must be verified by visual inspection by a Water System representative and a leak adjustment request form submitted.
- b. To qualify for an adjustment, the gallons billed must have increased 75 percent above the past three months' average.
- c. The adjusted bill will be based on the customer's past three months average water consumption plus the cost of 50 percent of the gallons originally billed above the customer's three months average usage.
- d. The customer shall acknowledge in writing that he/she has received information from the Water System about the adjustment and has taken the necessary steps to correct the deficiency in his/her service line. No more than one adjustment will be made within a 12 month period.
- e. The customer shall acknowledge in writing that he/she has been advised to replace his/her service line with pipe that has a pressure rating of not less than 160 psi and of a material meeting the approval of the Water System's engineer. No further adjustments will be made until these recommendations are followed.
- f. All adjustments must be approved by the General Manager and reported to the Board of Directors.
